

ELECTRIC PUMPS FOR DIESEL FUEL TRANSFER

Electric pumps 230V, volumetric self-priming vane. They are equipped with asynchronous induction self-ventilated with motor rate protection IP55, insulation class type F, internal protection. Built-in by-pass valve and stainless steel filter.

**Electric pump 150 l for diesel fuel transfer
equipped with:**

Power cable 2 m lenght, Schuko plug

Self-priming rotary electric pump

Cast iron body

By-pass valve

AC Engine

Stainless steel filter 100 micron

Motor protection rating IP55
